

We Understand Health Care Professionals

The home health care industry is seeing accelerated growth because millions of people are reaching an age when they will need home health care. Many people would rather receive care while remaining at home and view home health care as a better option compared to facility-based care centers. One of the threats to this industry is caregiver shortage and the cost of recruitment. C4 Operations provides background checks that are thorough, timely, and packaged to meet both your budget and compliance requirements in your state.

KEY INFORMATION

- Provide your clients with comfort and security by ensuring each employee has completed a thorough background check screening.
- Ensure compliance with state and federal regulations for caregivers.
- Minimize safety concerns by screening for fraud, elder abuse, criminal history, and sex offender status.

"Just wanted to give you a "good job"! Your staff is always right on it about calling and confirming, verifying etc. It is so helpful because in the long run it saves me money. We are a small business and every dollar counts so, THANK YOU!"
